

Albums 2008

As usual we asked our panel to nominate 6 new albums, 4 re-issues/compilations and 2 best packaged each, and gave every nomination a point. The main provisos were that albums should have been first released since November 2007 (though we do allow a bit of slack for things which are slow permeating through) and that they fall into the areas of music that we cover in *fRoots* – music from anywhere with roots in a tradition.

On the odd occasion where voters nominated an album which was illegible as it came within the previous year, we deleted the vote. Where they put an album in the wrong category – e.g. a re-issue/compilation in new albums – we moved the vote and counted it in the correct section. For those reasons, there are occasionally too many or too few votes in one category.

Here, divided into those three sections under each name, are the selections of those who voted, with the exception of the few who asked for their nominations to be kept secret, sometimes because of who they didn't vote for!
